Subject **CancerCare Manitoba New Referral Guidelines**

Following a review of our referral process, CancerCare Manitoba has implemented several improvements and will introduce new **Referral Guidelines**, effective **June 1, 2026**.

We are preparing the updated website content to outline the streamlined referral process, including revised forms and clearer descriptions of the minimum information required for patient referrals.

Once the new guidelines are in place:

- **Complete referrals** will be processed promptly and forwarded to CancerCare Manitoba's triage for further evaluation and determination of the appropriate next steps for consultation.
- **Incomplete referrals** will be returned to the referrer for completion before processing.

The streamlined approach is intended to strengthen our ability to triage, plan, and manage each patient's referral, ultimately improving the quality and timeliness of care.

These new guidelines will be available on the CancerCare Manitoba website at:

www.cancercare.mb.ca → Health Professionals → Referral Forms & Guidelines, or through the link:
<https://www.cancercare.mb.ca/For-Health-Professionals/referral-guidelines-for-physicians>

We appreciate your cooperation and understanding as we make this important transition.

For general inquiries, please contact 1-844-320-4545.
