

Analysis of CPSM Annual Registration Reporting

September 2026

Record Growth in Physicians

Last year reported another record-breaking net increase in physicians.

Uneven Progress

Western Manitoba

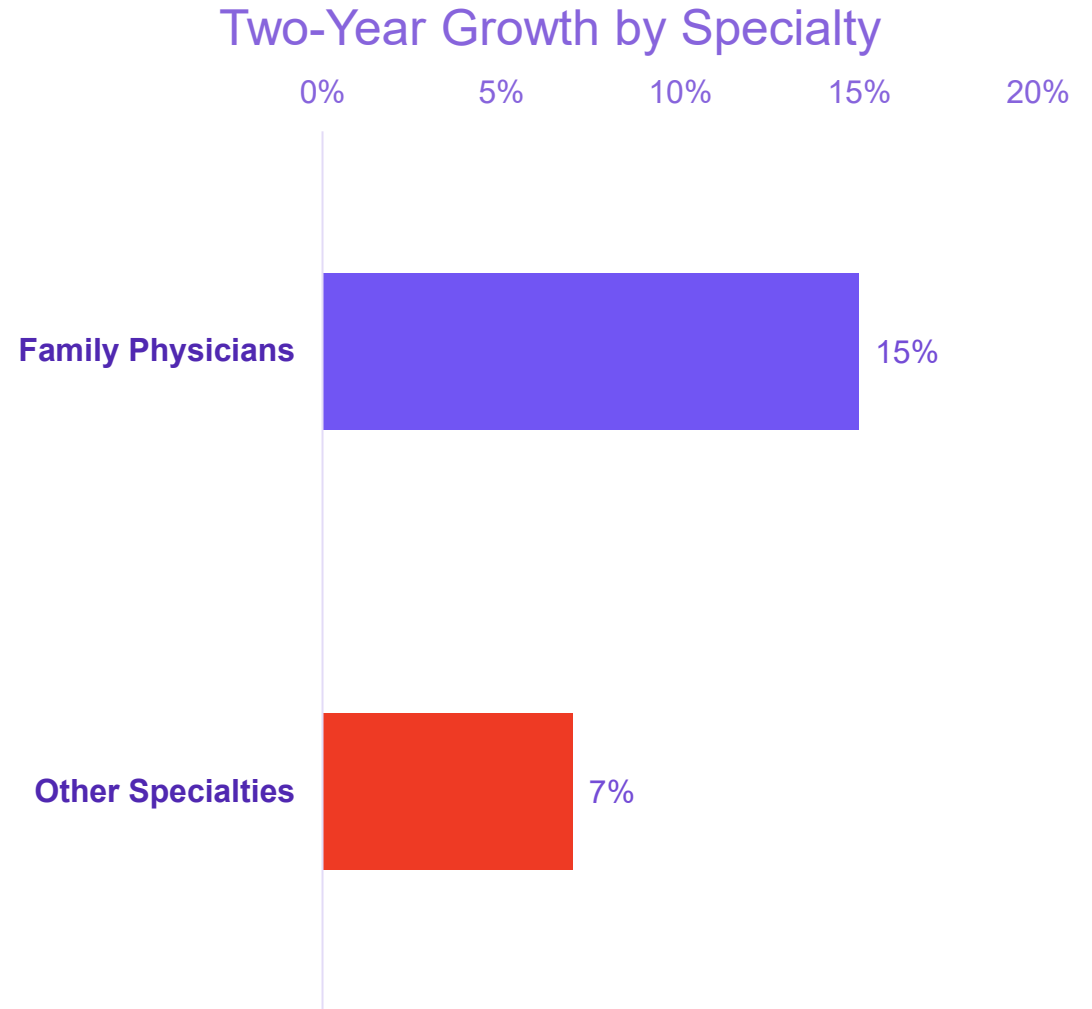

CPSM reports physician statistics by four regions in Manitoba. All saw increases last year except for Western Manitoba, which lost 8 physicians – a decrease of 3%.

Uneven Progress Specialties

Family physician recruitment has grown twice as fast as other specialties.

This helps more Manitobans connect with a family physician. However, it also generates more referrals for specialty care with a pool of specialists that isn't growing as fast.

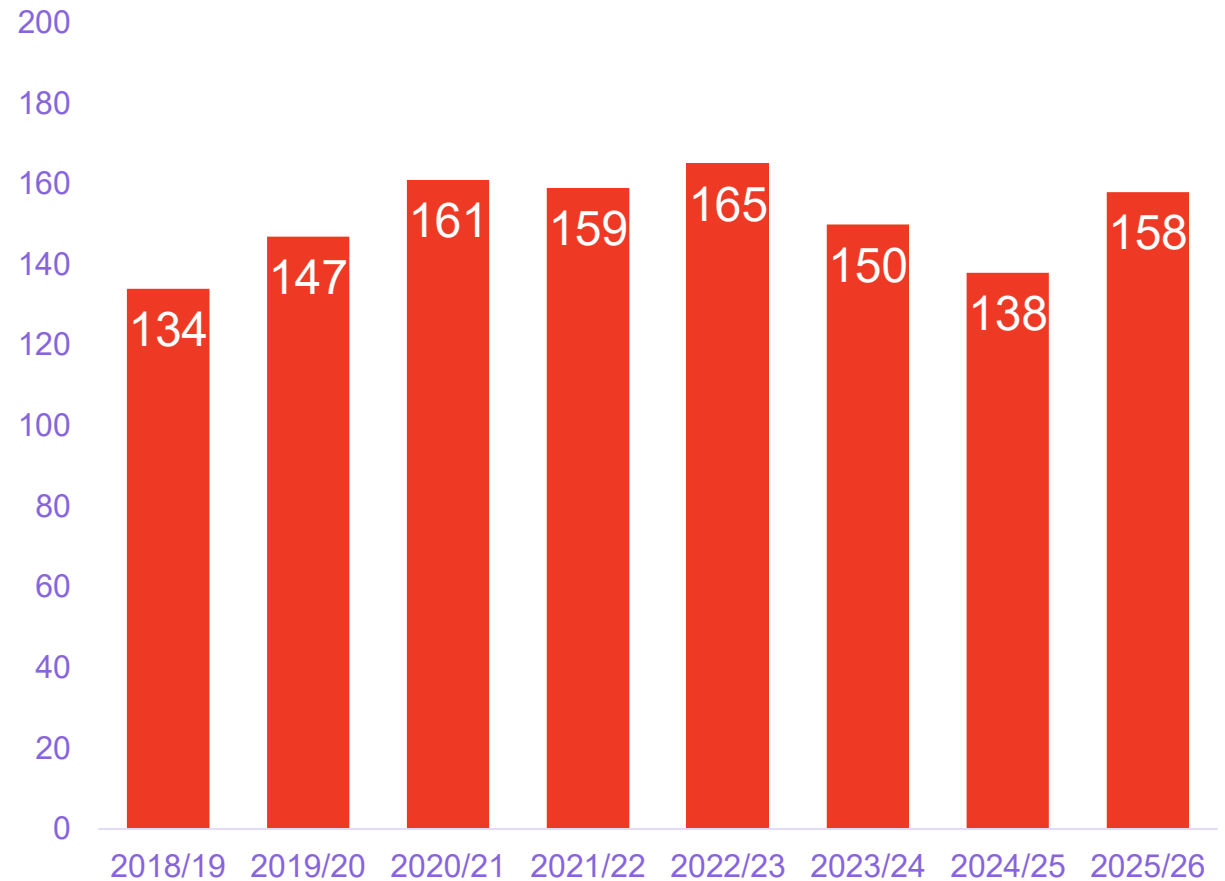

Leaving Practice

Retention Risk?

The number of physicians leaving practice has increased, returning to pandemic-era levels.
