

## TRANSFUSION MEDICINE

## Shared Health Request for Pre Transfusion Testing and Blood Components Requisition Update

Date effective: Monday, Jun 15, 2026

### Background Information:

The **Shared Health Request for Pre Transfusion Testing and Blood Components requisition** has been updated to include efficiencies that will positively impact patient care and lab operations.

### Change in Process:

Effective **Monday, June 15, 2026**, all STAT requests on this requisition **must meet any of the following patient clinical indications** to be tested as STAT:

- **Patient is actively bleeding**
- **Patient has symptomatic anemia**
- **Patient will undergo high blood loss surgery**

### Other Requisition Updates to Highlight:

- Inclusion of sickle cell disease or transfusion-related thalassemia patient history
- Addition of testing priority definitions and turnaround times

### Additional Notes:

- When a patient **has red cell antibodies** or **requires platelets**, a *CM077 Fax Notification* must be completed and forwarded to your site blood bank
- Refer to the *Shared Health Laboratory Information Manual* for specific sample requirements
- Historical requisitions will be accepted until **Monday, July 13, 2026**

### Requisition Ordering:

**Hard Copies:** Available for order at the HSC print Shop – **SAP #333349**

**Electronic:** Available on the **Shared Health Laboratory Information Manual** requisition section
