

ECHO Mental Health and Addictions

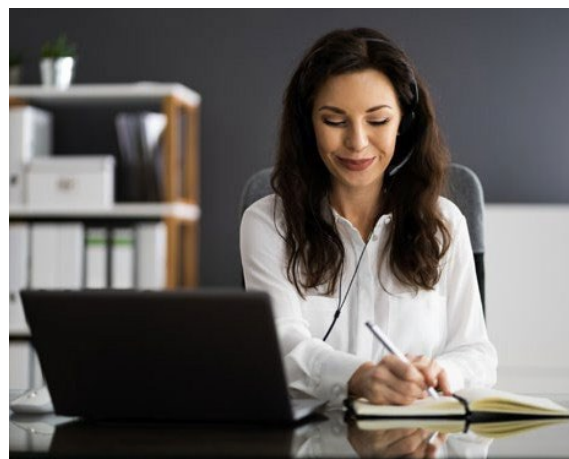

Child and Adolescent ADHD | Cycle 3

PROJECT ECHO (Extension for Community Healthcare Outcomes)

connects healthcare providers and paraprofessionals with interdisciplinary experts through videoconferencing. The program offers expert-led didactic presentations with discussions. Participants will present cases for team discussion and interactive discourse to enhance ADHD care across Manitoba.

Join us beginning **October 24th** for this **8-week** interactive program on **childhood ADHD**. This course is open to primary care providers who are currently treating pediatric clients/patients with ADHD and are seeking to collaborate with others in their treatment planning. Participants that register are encouraged to attend all sessions.

For each session, a participant is asked to bring a short ADHD case for discussion with the ECHO community and experts to generate care strategies and recommendations.

Click here for the online registration link.

- Registration opens on September 24th, 2025 (no fee)
- Registration deadline is October 21, 2025 at midnight
- Schedule: October 24, 31, November 7, 14, 21, 28, December 5, 21 (Fridays)
- Sessions held from noon – 1:30 pm CST
- A device with connection to the internet, preferably with a webcam, is required.

Session Topics Include:

- Clinical assessment and differential diagnosis
- Developmental considerations in diagnosing ADHD (preschool and adolescent populations)
- Managing medications and side effects
- Recommendations for ADHD management in schools
- What parents should know about ADHD
- Brief behavioural and psychosocial interventions for caregivers

Target audience for this series:

Family Physicians, Nurse Practitioners, Residents, Pediatricians, Physician Assistants, and other healthcare providers who are currently treating pediatric clients with ADHD.

The session is designed with prescribers practicing in Manitoba in mind. While this is a focus, other healthcare providers are welcome.

At the conclusion of this program, participants will be able to increase their knowledge and confidence in:

- Diagnosing ADHD in children and adolescents
- Non-pharmacologic management of ADHD in children and adolescents, including psychosocial and educational interventions
- Increasing knowledge and confidence in pharmacologic management of ADHD in children and adolescents, including counselling, prescribing, and side effect management
