Provincial Clinical Standard: Notification

NEW Provincial Clinical Standard: Prescribing Standards for Continuous Subcutaneous Insulin Infusion (Insulin Pump) Therapy for Patients with Type 1 Diabetes

Key Message(s):

- Effective **July 29, 2022**, clinicians that prescribe and provide care for Manitobans with Type 1 Diabetes (T1D) are required to follow the Shared Health Provincial Clinical Standard.
- The new standard is entitled: “Prescribing Standards for Continuous Subcutaneous Insulin Infusion (Insulin Pump) Therapy for Patients with Type 1 Diabetes.”

Background:

- Shared Health has developed a Provincial Clinical Standard to define the prescribing standards for Insulin Pump therapy for Manitobans with T1D.
- The clinical standard was developed in collaboration with adult and pediatric clinicians, endorsed by the Chronic and Complex Medicine & Rehabilitation Provincial Clinical Team and approved by the Provincial Clinical Leadership Team.
- This evidence-informed standard aligns with Diabetes Canada Clinical Practice Guidelines.
- This standard ensures that patients consistently receive safe, effective, and appropriate prescription of Insulin Pump therapy.

Required Action:

- Review the new Provincial Clinical Standard
- Disseminate this document to all stakeholders in your area by **August 5, 2022**
- If there are any questions regarding this standard please contact the Provincial Clinical Service Lead for Chronic and Complex Medicine & Rehabilitation at SHIntegrationQuality@sharedhealthmb.ca

Resources:

The following Shared Health resources are located here as of **July 29, 2022**

- **Provincial Clinical Standard: Prescribing Standards for Continuous Subcutaneous Insulin Infusion (Insulin Pump) Therapy for Patients with Type 1 Diabetes**
- The Insulin Pump Coverage Application Form will be accessible in the Accuro Electronic Medical Record via the Manitoba Forms Repository
- **Government of Manitoba – Young Adult Insulin Pump Program**

**Issued by:** Provincial Clinical Leadership Team, Shared Health
